Miners Favor Building of New Surgery

Suggestion Was Considered to Purchase Dr. Borden's Residence on Third Street.

Coleman Miners' Association voted on Monday on the proposal to build a new surgery, the vote being 500 for and 186 against. Following a meeting on Saturday, when the matter was fully discussed, a proposal was put forward to purchase the residence of Dr. Borden, which was considered suitable for the purpose by some.

As the consent of the membership must be obtained before money can be appropriated for this purpose, a pit-head ballot was decided on, with the above result.

It is proposed to erect a building on vacant land immediately opposite the hospital. The former doctors, R. P. Borden and T. Keith Macleod, rented quarters in the Morrison block, where patients were attended to every morning and evening.

For the present the same quarters are being used by Drs. Rose and Claxton. Further plans for the erection of a building will be considered by the hospital board, the chairman of which is W. H. Haysom, and the secretary is George Ford. J. Nash, J. T. Griffiths, Edward Wood, Walter Williams and A. T. Goldring are the other members of the hospital board.

Holiday visitors to Coeur d'Alene include Mr. and Mrs. Frank H. Graham and children, accompanied by Mrs. Graham's father, Mr. Fraser, of Edmonton, and Mr. and Mrs. Sidney C. Short and children.

FORTY-TWO YEARS AGO AN OUTING TO CROW'S NEST LAKE

"Dug" Allison Surprises the Surveyors.

In the month of August, 1896, the writer, in company with five friends, made a memorable trip to the Crow's Nest Pass, virgin ground to all of us. Visibility was down to zero, due to heavy fires raging south of the line. A month earlier "The Pass" had been swept by fire, much valuable timber having gone up in smoke, the scenic beauties of "The Pass" receiving a terrible blow.

Today, more than 40 years later, the whitened trunks of flame-killed trees by the thousands are to be seen in distant canyons and on the mountain sides, mute reminders of the terrible and destructive conflagration. During the years that have passed, Nature has not been idle, a healthy growth of new timber now covering much of the burned-off area.

The forestry service is doing good work in safeguarding this new and healthy growth, and it is "up to" the travelling public to take every precaution in preventing a recurrence of what may truly be called a national calamity.

Entering The Gap (entrance to Crow's Nest Pass) our troubles began. We followed a dim wagon trail through the heavy timber, finding it obstructed in many places by fallen, half-burned trees, which had to be cut and removed before we could proceed. Luckily every man in the outfit was an expert in the use of the axe. The road was rough in the extreme, and between The Gap and the lake we made six crossings of the Old Man river, the banks being steep and rocky and taxing the pulling powers of the four-hand police team we were using. From the lake onward a pack trail, travelled in single file by pack

horses, led further afield.

The Cave and Basin was the object of our quest and was well worthy of a visit in those days. The roar of the torrent of water plunging into the lake from the opening in the cave could be heard a long distance. Visiting the site many years later, we found the surroundings greatly changed, the cliff having been partially obliterated by the blasting operations carried out during the construction of the railway a year or two later. The walls of the cave we found to be covered with the names of visitors, many hailing from far-off lands.

Indian Paintings

Much of the smoother wall space contained pictures drawn in green and black paint, the work of long dead-and-gone Indian artists—the colors bright and undimmed by the passage of time—there being depicted bears, wolves, buffalo, elk, etc., while one large picture portrayed a group of sleeping Indians wrapped in their blankets, their feet turned toward a smoking camp fire, while behind the sleepers is seen a number of creeping Indians, armed with tomahawks and war clubs about to attack the sleep-drugged enemy.

"Dug" Allison and the Surveyor

Emptying into the lake is "Allison Creek, named after an old-time settler who farmed for some years in that vicinity. "Dug" had served in the mounted police and owned a pack-train of cayuses, also acting as guide to hunting parties in the mountains in an effort to earn an honest dollar.

His name is connected with this story: When the engineers came into "The Pass" to locate the new railway, Allison had noticed with surprise the location of the surveyors'

THE WAY TO WIN FRIENDS

is by attractively displayed advertising in The Journal. The weekly community newspaper is eagerly read by young and old, and influences their buying more effectively than any other medium. That's why big national advertisers use the weekly newspapers throughout the whole of Canada. They know, for their advertising is placed in a medium where it will accomplish the best results.

stakes and, being curious by nature, sought the chief engineer, enquiring why they were being put down. That gentleman, pitying Allison's density and wishing to enlighten him, explained that the stakes indicated that a railroad would be built there. "A dangerous place to build a railroad," declared Allison. "What do you mean?" demanded the surprised surveyor. "Why," retorted Allison, "if you build a railroad there, at times it will be under water. Come with me and I will show you. And he thereupon led the surprised official to where, in the tops of low-growing shrubs and trees, could be seen drift-wood and debris lodged in the branches during seasons of unusually high water.

Allison received not alone the thanks of the chief engineer, but was rewarded in a more tangible manner by the C.P.R. management.

(Ed. note—The foregoing interesting story is contributed to The Journal by Mr. Tom Clarke, father of T. Clarke, junior, of Coleman. Though well over 70 years of age, he follows an active life, and occasionally comes from Macleod to visit his son and wife. He served in the old Royal Northwest Mounted Police, and after completing his term, took up his trade of printing at Macleod, working on the old Fort Macleod Gazette, and in later years establishing a commercial printing office, which he still continues.)

Crows Nest Lake and Mountain—A Beauty Spot Near Coleman

Let Everyone Boost for The Hockey Carnival

President Harry Gardner, of the hockey club, is planning with enthusiasm for the novelty carnival on August 6th and 8th. It is his ambition to raise finances in order that the club may have a good start next season, therefore, everyone is urged to support the carnival by their attendance as much as possible and to buy ticket for the major prizes.

Several girls have already started a campaign to sell tickets. The one selling the most will be crowned as the carnival queen.

Mrs. Gardner is organizing a flower show as a feature of the carnival, and beautiful bouquets will be available for many, as people with gardens have promised to supply flowers. The bouquets will be sold for a small charge to benefit the club.

The major prizes will be a Chesterfield suite and a refrigerator. Booths will include two grocery booths, drug booth, doll booth, two crown and anchor wheels, and other features. A jitney dance will be held each night. Give the club executive a good boost for an Allan Cup team this coming winter.

See Norman E. MacAulay, "The Insurance Man," for all forms of insurance. (adv.)

MRS. UPTON'S PUPILS GAIN HONORS

The following pupils of Mrs. R. Upton, Bellevue, were successful in passing the Toronto Conservatory of Music examinations in piano: Elaine Korman, Titano Rizio and Pat Emerson, of Coleman; and Lily Padgett, of Bellevue. Elaine and Titano, first-class honors, 82 and 80, respectively.

FORMER RESIDENTS HERE

Mrs. Tom Graham, with her son Tom, and daughter, Mrs. Robert Hutchinson, of Seattle, were the recent guests of Mr. and Mrs. Wm. Bell at the Grand Union. The Gramhams were Coleman residents eighteen years ago, their last visit to Coleman being in 1930. While here they renewed acquaintances with many old friends, several teas being given in their honor. Mr. Graham, senior, is chief engineer for the city of Seattle. They were accompanied on their trip home on Wednesday by Mrs. Wm. Bell, who will spend a few weeks' vacation at Seattle.

VISITING OLD FRIENDS

Walter Nelson and his sons left by auto on Saturday for a two weeks' trip to various points in Saskatchewan, going via Montana and North Dakota. About 1905 Walter lived for a year or so in Arcola and Stoughton districts, and he will renew acquaintances with old friends there.

Balloch and Jenkins To Compete at Provincial Tournament

Attention of local tennis fans next week will be centred on the provincial tennis tournament to be played on the Banff Springs hotel courts, starting Monday and continuing all week. Balloch and Jenkins will carry the Coleman colors, and are expected to give a good account of themselves. Dick Shone will not compete.

Jenkins, partnered by Shone, last year won the secondary doubles. Balloch marched into the finals of the men's doubles with his partner, where he lost out. This year he will have Harry King, of Calgary, as his doubles partner.

HONESTY

Recently Mrs. A. Anderson entered the local post office, where she picked up a wallet containing \$100. Unhesitatingly she gave the wallet to the postmaster and asked him to find the owner. The owner proved to be A. Mr. Kapaka, of West Coleman, who showed his appreciation to Mrs. Anderson in the shape of a \$10 bill.

Mr. W. Cole, senior, after spending several months here, left on Sunday for his home in Victoria, and was accompanied by Mrs. Cole, who had been spending a week visiting friends in The Pass.

Coal or Gasoline? Which Helps Your Business?

Every time a merchant has goods delivered by truck that can be brought in by rail, he should ask himself the question: "Which is providing me with cash to run my business?" The Journal has stressed this on many occasions. Miners in Coleman earn their wages by digging coal. Every time you help to lessen the use of coal, you are helping to cut down their employment. Merchants should take note of this, for merchandise brought from the cities by truck instead of by rail can have very serious consequences to retailers who depend on the coal industry, and that includes every store and business in the Crow's Nest Pass.

MINERS DIG COAL—NOT GASOLINE

Town Council Notes

A regular meeting of the council was held on July 26, with Mayor Pattinson, Councillors Atkinson, Antrobus, Chapman and White present.

The minutes as corrected were adopted and the Auditor's quarterly report was accepted and ordered filed.

The correspondence regarding the hard-surfacing of the piece of road around the bluff was ordered filed and the Mayor was authorized to get in touch with Mr. N. H. Bradley, district engineer, regarding same.

The secretary was instructed to write to the department of public health and advise them to acquire the piece of property they had in mind, to be used as a nuisance ground, in East Coleman.

The assessment on the nuisance ground owned by the town of Coleman was accepted and filed.

Secretary was instructed to write the board of public utilities commissioners and endeavor to hurry up the procedure of annexing part of Plan 6808Cu within the town limits.

It was decided that any place of business that has signs projecting and blocking part of the sidewalk, must be advised to remove same.

Notice of motion was given for bringing in a by-law governing the parking of trucks on the main street.

ATTENDING ELKS CONVENTION AT LETHBRIDGE

W. E. Read, exalted ruler of Coleman Elks, and Wilfrid Dutil, are the accredited delegates to the provincial convention.

Frank Barrington, district deputy grand exalted ruler, and a number of local members motored down yesterday afternoon to join in the welcome to Percy Pound, grand exalted ruler for the whole Dominion.

PERCY W. POUND

Presiding this week at provincial convention of Elks in Lethbridge.

ANNIVERSARY EDITION

There are still some copies of the Dominion Day edition of The Journal, and anyone who has mailed to my address in the world for 10c per copy. This is an easy way in which to let friends and relatives know something of the town in which you live.

Why Aren't They Made To Pay?

Plain Talk on Injustices Whereby Coleman Printers Pay Taxes—Outsiders Pay Nothing.

(Drumheller Mail)

It seems that a great many other towns and small cities have the same complaint to offer as have certain Drumheller businessmen, whose territories are encroached upon by outsiders. Representatives of big city interests come into the smaller centres and "steal" away hundreds of dollars' worth of business, which legitimately belongs to local citizens and taxpayers.

Local printers probably suffer worse than any other business. It should be remembered that printing establishments have not the number of customers possible in any of the retail stores—they cannot draw on every family in the district to support their businesses—they are entirely dependent upon the businessmen, mining companies, societies and organizations for their livelihood.

Yet hundreds of dollars per year—probably thousands—from the Drumheller Valley go out to "foreign" printing establishments. Just why should any businessman of Drumheller pay a business tax, as well as house and store property taxes, when an outsider can come in and sell his product, leaving again without having been asked to donate one cent toward the city treasury? We know this question has been put dozens of times, but it is about time something were done about it. Money sent out of town never returns—the representative who solicits business here to take that money out of town, spends only enough to cover hotel bill and meals—probably ten dollars in all—and he walks off with a thousand dollars' worth, or more, of business, stolen from local taxpayers.

It's up to the City Council to protect those who pay taxes to keep the City going!

HEARKEN TO THESE WORDS

"We don't dig gasoline; we dig Coal. Stop! Look! Listen! You are wrecking the coal industry when you bring in goods by truck. Use the railways—the best friends of the coal business has"—Ferne Board of Trade.

SERVICE APPRECIATED

When it came to discussing whether Moose Jaw should allow its aldermen to give radio addresses and inform the public what the city council was doing one alderman suggested that the daily newspaper of that city was carrying ample reports and giving the city splendid publicity so the motion did not carry.

Printers were taxpayers and should be considered, he added—Printer and Publisher.

An Educational Need

"The strength of a nation depends to an incalculable extent upon its educational facilities."

A whole volume—nay, many volumes—of wisdom and truth are couched within the foregoing sentence, an extract from a brief submitted to the Rowell Commission on Dominion-provincial relations by two professors of the University of Toronto on behalf of the student body of the nation.

The purpose of the brief was to present to the Commission claims of students for the establishment of State scholarships to permit entry to the universities of the country of many who could never afford the opportunity which these institutions yield for broadening the mind and for training for leadership but who, otherwise, are well qualified.

The request for the establishment of such scholarships is based, not so much on the need for training minds which might subsequently be expected to be capable of contributing to technological development, but rather to ensure training of experts in the field of the social sciences, a sphere of activity in which, it is pointed out, comparatively little research work has been undertaken in Canada and for which no provision has yet been made in the programmes of the National Research Council.

Information supplied the Commission shows that in this respect Canada lags far behind the other Dominions as well as other leading countries outside the Commonwealth; that in this country there is no provision for State matriculation scholarships and that the number of awards from private sources is relatively small.

West In The Cold

Moreover, data and statistics contained in the brief demonstrate conclusively that in the matter of scholarships available from private sources the western provinces are discriminated against to an extraordinary but quite understandable degree. For, to quote the brief, "of 524 matriculation scholarships available annually in this Dominion having an aggregate value of \$108,140, the Province of Ontario receives 288 with an aggregate value of \$76,000, leaving less than half the amount to be distributed in 236 awards in the remaining eight provinces."

As a result some of the brightest minds are directed to the eastern institutions of learning and, again to quote the brief, "thus is the west deprived of the very men who might be expected to contribute most to a solution of her pressing economic, social and political problems."

Because of this situation and because of the inability of the provinces, and particularly the western provinces, to finance scholarships to anything like an adequate degree, it is suggested that Federal aid be sought to enable the provinces to finance State scholarships and thus provide at least the means to ensure the education of those who show greatest promise in the field where the west urgently needs assistance—the cultivation of minds capable and fully equipped to solve problems of great magnitude.

Not The Entrance Key

It might be urged in opposition to such a plan that already too many students are being turned out of western universities for whom apparently there is no place in the commercial and economic life of the country under present conditions, but this can at least be partially attributed to the fact that brilliance and ability do not furnish the open sesame to the university classroom.

In too many instances desks in the university classrooms are occupied by students who are sufficiently apt to escape through entrance and subsequent tests with a minimum of effort and whose parents furnish the wherewithal simply because it is the thing to do; because a university degree is regarded as a hall mark of class distinction, or because it is believed that social or business contacts made there will be of some assistance in later years.

On the other hand many who are mentally equipped to a far greater degree and who could derive a great deal more benefit from a university education are unable to do so because of family poverty or because of their own inability to finance their way through college. Thus there is a real loss not only to the individual and the family but to the community and perhaps the nation. Scholarships, such as those proposed to the Rowell Commission would, to some extent at least, remedy this condition.

Of Further Importance

There is a further thought worthy of consideration when the establishment of state scholarships is under advisement. When it is remembered that the universities are expected to turn out men and women who will, and should be, leaders of opinion in their respective communities and provinces, the necessity of affording every opportunity to youth of brilliant mind, capable of clear and logical thinking, to pursue their studies to a conclusion, is highly important in a country which is only now shaping her future destiny, and in a day and generation when democratic institutions and form of government are threatened by new and untried political and social doctrines.

With a large number of people too inert to do their own thinking and willing to be stampeded in any direction at the behest of glib oratory, it is highly important that encouragement and opportunity be given to talent wherever it may be found and to give the best brains full opportunity for development in order that leadership in the future may be founded upon experience, logic and sound commonsense, if the country is to make progress and the future is to be assured.

Cost Of A Dukedom

It cost £250 (\$1,750) to give the Duke of Windsor his dukedom. Supplementary civil estimates included an item for stamp duties on "royal warrant, letters patent and the document creating the Dukedom of Windsor."

People are reading fewer but better books than they used to, says a librarian. If they read only the better books they are certainly reading fewer.

Silkworms outgrow their skins four times during their rapid growing period.

Snakes shed their eyelids when they shed their skins.

Canyon Under The Pacific

Is Believed To Contain All Varieties Of Minerals Known

The discovery of phosphorus 1,000 feet under water on a Pacific ocean canyon opens a new world for fortune hunters. The finding was described at the Scripps Institute of Oceanography by Dr. F. F. Shepard, geologist of the University of Illinois.

The fertilizer rock was dredged from the upper walls of the submarine canyon 50 miles off the shore of California. The phosphate nature of the rock, he said, was determined by K. O. Emery, who is making a study of the rocks collected from the canyon.

This canyon is one of scores discovered in ocean bottoms by geologists in the last two years. The canyons are in all oceans. They are an exception, however, in that the bottoms are not muddy. Their walls are rocky and the rocks are of all kinds, like those on land.

There is reason to believe that the submerged walls contain all the varieties of minerals known. Some of the canyons are as large as the Grand Canyon of the Colorado River. The phosphate rock canyon is V-shaped. Its bottom lies half a mile under water. Its sides are from 1,200 to 2,000 feet high. Dr. Shepard dredge took the samples from a stretch 20 miles long, indicating that the deposit is probably extensive and rich.

The phosphate was identified as of the Miocene Age. That age ended about 17,000,000 years ago. It is possible, Dr. Shepard said, that phosphate may be forming now in the submarine canyon. From this same area where it was found he brought up fossil bones of an unidentified animal.

The geological prospectors seek to learn the origin of these great channels in ocean bottoms. They are among the most mystifying discoveries ever made. Their walls range from granite to soft shale. Some of the rocks are volcanic, but most of them are sedimentary, which means that they were formed by the weight of huge deposits of earth.

To Guard Switzerland

Little Country Has Devised Unusual Means For Its Defence

Hundreds of little, round metal manhole covers dot the highways and byroads of Switzerland near the Confederation's frontiers with Germany. They're a key part of Switzerland's national defense system.

Beside the highways lie piles of steel rails. Most travelers who see them think they've been left by the roadside to rust by careless railroad workers. Investigation, however, may show one end of the rails has been ground into a sharp point. When hasty Swiss soldiers hold their maneuvers on the frontier, however, the secret is lost. In the "battle" plans the "war" begins when the hypothetical enemy crosses the frontier.

Sharp spurs scream out in the frontier towns and villages. The troops tumble out of barracks and rush to their defence positions while the villagers and Swiss farmers run to the highways.

Some villagers, using the simple lid lifters all Swiss kids know by rote, raise the little iron manhole covers. Others carry the rails out to the highways.

The little round holes reveal a deep slot with a reinforced concrete base. In go the rails with the sharp points pointed toward the frontier. "These little round holes in the road," said an officer of the Swiss frontier troops, "mean the minutes, perhaps hours, of delay that may some day save Switzerland."

Making Use Of Drugs

Japanese Trying To Undermine Health Of Chinese In Korea

War has always brought misery in its train; but there can be nothing in history so foul as the manner in which the Japanese are now trying to undermine, by the use of drugs, the health and morals of the inhabitants of the occupied area in the north. China and the world will always remember the stern and effective steps taken by Generalissimo Chiang Kai-Shek to stamp out the drug traffic and will regard the Japanese with loathing for the policy they are now following of encouraging the use of drugs amongst the Chinese and foreigners who are temporarily within their sphere of influence.—Hong Kong Press.

Airplanes may replace mule-trains as a means of exporting chicle from dense jungle of northern Guatemala.

Religious Broadcasts

Sunday Afternoon Sermons May Be Started In October

Although the newly-created national advisory council on the broadcasting of religious services includes representatives of the five larger Canadian churches, smaller religious organizations will not be neglected in religious broadcasts, Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, indicated.

Smaller denominations, including the Salvation Army, Disciples of Christ, Christian Science and Latter Day Saints will be given opportunities to share in the broadcast.

The national council is composed of the following: Rev. Carl V. Farmer, Baptist; Rev. Briarly Browne and Rev. J. E. Ward, Church of England; Rev. J. B. Thompson and Rev. Joseph Wason, Presbyterian; Mons. Edward M. Brennan and Rev. Charles Langhler, Roman Catholic; Rev. J. R. Mutchmor and William L. Orr, United Church. All are from Toronto. Mr. Ward is chairman and Mr. Mutchmor secretary of the council.

It is proposed to provide two national half-hour religious broadcasts Sunday afternoons and regular half-hour regional broadcasts of religious services Sunday mornings.

The morning broadcasts will not be started until January at the earliest but the afternoon broadcasts will likely begin in October.

The corporation has set aside one half-hour, 12:30 to 1 p.m. (M.S.T.), and the half-hour 3:00 to 3:30 p.m. (M.S.T.) for the new broadcasts. The first half-hour has been allotted by the advisory council to the Roman Catholics and the second to the Protestant churches starting as follows: Oct. 2, Baptists; Oct. 9, Church of England; October 16, Presbyterians; Oct. 23, United Church.

Good News For Neighbors

Amateur Pilot Forbidden To Fly His Home-Made Plane

Herman Schapansky, Weatherford, Okla., the butter and egg farmer who pilots his home-made planes to one-point landings—on the nose—has been grounded.

He was ordered to stay out of the air because he has no pilot's license. Neighbor farmers, accustomed to scurrying to storm cellars when they heard the sputter of Schapansky's motors, breathed a sigh of relief.

Schapansky—who soloed and crashed the first time in a junked Jenny airplane with a "model T" motor after only three flying lessons—said: "I'm a good flyer. They don't give an ambitious young man a break in aviation any more. How far do you think the Wright brothers and Lindbergh would have gone if they'd got caught in this red tape?"

It was said most of the time Schapansky flies directly down a highway, so when he crashes he will be in a convenient place where his wife can pick him up.

On his first solo flight, fortified only by the lessons he exchanged for chores at an airport, Schapansky said he went up 200 feet, stalled and crashed. Neighbors pulled him from the cockpit bleeding.

Undismayed, Schapansky built more planes. Few of them flew long and crackups became so regular his wife said she stood by a telephone, to answer the calls when he crashed. Neighbors, ready to get him and the plane when it plumed down in someone's pasture.

No person ever went up with Herman.

Believe In Miracles

Couple In Ontario Escape Death In Grade Crossing Accident

At least two people in Ontario must believe that miracles still happen, as well as accidents.

Their car stalled on a grade crossing.

A train came along at 80 miles an hour and cut off the front quarter of the car as cleanly as if a giant knife had done it.

They were left seated in the other three-quarters, without a scratch, although suffering from shock.

There's a man and his wife who have something to write home about. Unfortunately, for most people who drive onto grade crossing, when trains are approaching, there's nothing to write home about except funeral arrangements.—Detroit Free Press.

Sir Henry Morgan, the famous pirate, was knighted by the King of Spain and made lieutenant-governor of Jamaica because of his fearless expeditions against the Spanish.

Peter Topp, foreman of the fish hatchery in Yosemite National park, eastern California, trains wildcats for a hobby.

In Java, thunderstorms occur on an average of 223 days a year.

Only Firestone Tires ARE GUM-DIPPED for EXTRA STRENGTH

EVERY FIBRE INSULATED WITH RUBBER

GUM-DIPPING is a patented Firestone process not used in any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 58% longer flexing life. Yet you do not pay one cent more for this extra value. And you also get 2 Extra Cord Plies under the tread and the Firestone Scientifically Designed Safety Tread.

See the nearest Firestone Dealer today!

Firestone GUM-DIPPED TIRES

"MOST MILES PER DOLLAR"

SELECTED RECIPES

SALMON MOLD

- 1 package Lemon Jell-O
- 1 pint hot water
- 3 tablespoons vinegar
- 1/2 teaspoon salt
- 4 teaspoons drained horse-radish
- 1 cup flaked salmon
- 1 cup cooked peas, fresh or canned
- 1 cup cooked diced carrots

Dissolve Jell-O in hot water. Add vinegar and 1/2 teaspoon salt. Pour small amount of Jell-O in bottom of loaf pan. Chill until firm. Cut remaining Jell-O until slightly thickened. Add 1/2 teaspoon salt and horse-radish to salmon and vegetable and mix very lightly. When remaining Jell-O is slightly thickened, fold in fish and vegetable mixture. Turn loaf pan over from Jell-O layer. Chill until firm. Unmold and cut in squares. Serve on crisp lettuce. Garnish with mayonnaise and sprigs of parsley. Serves 8.

BEEF LUNCHEON SALAD

- 1 package Lemon Jell-O
- 1 pint hot water
- 3 tablespoons vinegar
- 1 teaspoon salt
- 1 1/2 cups diced cooked beef
- 1/2 cup shredded cabbage
- 1/4 cup diced green pepper
- 1/4 teaspoon scraped onion

Dissolve Jell-O in hot water. Add vinegar and 1/2 teaspoon salt. Chill until slightly thickened. Season beef, cabbage and green pepper with 1/2 teaspoon salt; add onion. Fold into slightly thickened Jell-O. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise and slices of hard-cooked egg or stuffed egg. Serves 8.

Do All Farm Work

Sisters Have Managed For Forty Years Without Help

Miss Mary Williams has died at the Misses Williams' farm near Woodford, England, but her three sisters will continue to run the place without a man to help as the four had done for 40 years. The sisters plow, make hay and run a market garden, and with their ancient spinning wheel spin yarn. They also make their own clothes and stockings.

Spanish Insurgents Capture Large Area In Whirlwind Campaign

Hendaye, France.—Spanish insurgent commanders reported they had swept government troops from the rich Estremadura region of south-western Spain in a smashing whirlwind campaign.

During five days of the victorious drive, the insurgents said two armies commanded by General Gonzalo Quelpo de Llano and General Jose Saliquet captured 23 important towns and villages along with 3,125 square miles of territory and the population of which exceeded 400,000.

The drive, which started as an effort to keep General Jose Mija from withdrawing his government troops to reinforce the defenses of Valencia, developed startling government weaknesses in the southwest and became a serious offensive itself.

Starting with the capture of Castuera, which the insurgents said was the government capital of provincial Estremadura, the combined forces of Quelpo de Llano and Saliquet advanced 25 miles in one day, the insurgents reported.

They captured the twin cities of Don Benito and Villanueva de la Serena, as well as Navavillar de Pala, in the fertile Guadiana river valley.

The advancing troops said government fighters were slaughtered as they fled. Thousands of government men were reported captured and more than 1,000 bodies left on the field by the demoralized defenders.

In the Castellon de La Plana sector of the eastern front, near the Mediterranean, the insurgents reported the capture of the first two trench lines of government fortifications barring their path towards Segorbe.

The town straddles the Teruel-to Sagunto, where it connects with the main coastal highway to Valencia. Gibraltar.—The Norwegian motor ship Tirranda wireless one of her crew was killed Sunday in an attack by an unidentified bombing plane in the Mediterranean sea, 50 miles off Oran, Spain.

The ship said several incendiary bombs were dropped and that her decks were raked by machine gun fire.

Request Was Refused

No Automobile Will Be Provided For Governor of Bermuda.

Hamilton, Bermuda.—Governor Sir Reginald Hildyard, of Bermuda, will use a carriage to inspect the island's military forces.

In the Bermuda house of assembly a request for an automobile for the governor, who is also general officer in command of the island's armed forces, was denied.

Speaker Conyers of the assembly said it was ridiculous for the governor to have an automobile merely to inspect 300 troops.

First Survey Flight Of Air Route Across Atlantic Is Completed

Port Washington, N.Y.—Great Britain's 10-ton pick-a-back plane swooped to a graceful stop on the seaport of New York city to complete the year's first survey flight of the projected commercial air route across the north Atlantic.

It was the first flight of its kind. The four-engined plane was launched in the air from the back of its "mother ship," the Maia, over the Irish coast and made a non-stop flight to Montreal, rested there two hours and 40 minutes, then flew to Port Washington in two hours and eight minutes.

The Mercury completed the 3,042-mile journey in 22 hours and 28 minutes flying time. The non-stop flight to Montreal's seaplane base at Boucheville, Que., consumed 20 hours and 20 minutes.

Piloted by 28-year-old Captain Donald C. T. Bennett, with wireless operator Albert J. Coster as the "crew," the plane looked small as it taxied slowly to its mooring, compared with the big British and United States flying boats which regularly ply between here and Bermuda.

The plane unloaded at Montreal and New York a shipment of London newspapers and newswires showing the arrival of King George and Queen Elizabeth on their state visit

Wins By-Election

Young Barrister Retains Brantford In Liberal Column

Brantford, Ont.—A 31-year-old barrister, one of the youngest candidates to contest an election in Ontario in years, retained Brantford for the Liberal party in a by-election called to elect a successor to the late Hon. M. M. MacBride, provincial minister of labor.

H. Louis Hagey, former alderman and a member of the public utilities commission, polled a plurality of 1,146 votes over Reginald Welsh, Conservative candidate, and two other opponents. The vote: Hagey, 6,284; Welsh, 5,138; Paul Debragh, Socialist-Labor, 58; Walter J. Dowden, Labor-Progressive, 2,344.

The vote of 13,824 was unexpectedly heavy in view of the number of citizens out of the city on vacation. In last October's general election, when Mr. MacBride, who died last June 5, was re-elected to his term in the legislature with a plurality of 2,602 over two opponents, the total vote was 15,069.

Fast Transportation

Newspapers Sold In Montreal 24 Hours After Publication In London

Montreal.—For the first time in history, British newspapers, brought to Canada on the pick-a-back plane Mercury, were sold on the streets of Montreal within 24 hours of their publication in London.

Also aboard the Mercury were photographs for the Associated Press of the Paris reception of the King and Queen. These were picked up at the landing point and rushed to Montreal where they were transmitted to New York via "wirefoto" equipment.

The newspapers, featuring pictures and news stories of the state visit to Paris, included the London Times, Telegraph, Daily Express, Mail Chronicle, Herald, Mirror, Sketch, Financial Times and Financial News.

New Coinage For Germany

Berlin.—Field Marshal Hermann Goering called in all foreign and domestic gold pieces, even those in coin collections as a prelude to establishment of a uniform coinage for greater Germany, including Austria. The decree, aimed at gold coin hoarders and collectors, ordered the delivery of all coins to the reichsbank before Sept. 1.

British Pilot Killed

London.—Sergeant Maurice Reginald Kennedy, of the Royal Air Force, was killed when his Hawker Hurricane pursuit plane cracked at Hillingdon, Middlesex.

Attack On Douglas

Social Credit Party In Britain Have Renounced His Leadership

London.—The Social Credit party of Great Britain and Northern Ireland broke with Major C. H. Douglas, Social Credit expert, at a stormy meeting in which blows were struck and police summoned.

Members assembled at a meeting called by a friend of Major Douglas to welcome George Powell, and to "reclaim publicly the Saskatchewan election result as an unprecedented triumph for Social Credit."

The meeting did not hear Mr. Powell, Major Douglas' representative to Alberta, as an uproar broke out and John Hargrave, national leader, in vigorous tones declared the party renounced Major Douglas' political leadership because "it no longer is possible for us to regard as fit for leadership a man who completely failed to seize the golden opportunity presented by the 1935 electoral victory in Alberta and now seems likely to make confusion worse confounded by childish, makeshift political tactics."

Mr. Hargrave said he took the opportunity to "publicly repudiate any claim made by or on behalf of Major Douglas to the political leadership of the Social Credit movement and to denounce as futile, illusory and pernicious the Social Credit secretariat's past and present political tactics."

He declared: "In the future the Social Credit party, under my direction, will take what political steps may be considered necessary to establish Social Credit in Great Britain without any reference to Major Douglas or his associations. We claim a free hand to proceed along electoral and mass pressure lines, and take this opportunity of urging every Social Credit organization throughout the world to follow our fighting lead and shun the gradualist tactics and strategy proposed by Major Douglas."

A Royal Welcome

The King And Queen Cheered In London On Their Return From France

London.—Thousands at Victoria station and Buckingham palace cheered the king and queen on their return from their four-day state visit to France.

Crowds reminiscent of the coronation were enacted outside Buckingham palace, where thousands jammed near the gates and others clambered atop the Queen Victoria monument.

The King and Queen later acknowledged the singing, roaring approval by making an unexpected appearance on the palace balcony with their daughters, Princess Elizabeth and Princess Margaret.

By this time the king was looking a little tired. The queen bowed and waved to the crowd, which shouted "Vive la France. Vive l'Angleterre!" The queen responded anew, throwing kisses and the throng, Hats, newspapers and gloves sailed into the air.

Accepts New Post

Vice-Chancellor Of Belfast University Will Head B.R.C.

London.—Frederick Wolff Ogilvie, 45, president and vice-chancellor of Queen's University, Belfast, was announced as choice of the B.R.C. board of directors to become director-general. He is to take up his new duties Oct. 1, succeeding Sir John Reith, who resigned to become chairman of Imperial Airways.

"MAGNA CARTA" SPEAKER

Hon. J. Earl Lawson, K.C., M.P., who spoke on the recent C.B.C. coast-to-coast special "Magna Carta" radio program, Mr. Lawson is a Conservative member for South York.

British Migration

Would Populate Dominions As A Stabilizing Influence

London.—Migration of British people to sparsely-populated parts of the empire as a stabilizing influence in world affairs was urged by various speakers in the house of lords.

Participating in a debate on a report of the overseas settlement board, the Duke of Devonshire, under-secretary for the dominions, declared land-hungry countries regarded the empire as holding a large area of the earth, "unable or unwilling to occupy and develop it, but preventing others from settling it."

This condition, the duke argued, "is not conducive to peaceful or settled international relations." He urged collaboration quickly between the dominions and the United Kingdom before it was too late to populate the dominions with men and women of British stock.

Viscount Elibank, who has travelled extensively in the empire, submitted the best arrangement for the present was for people to migrate from the United Kingdom on what was called a policy of infiltration. Only Australia had subscribed to that policy, he added.

"Canada does not require more immigrants as she still has unemployment, and political conditions are such, apparently, that she does not require them," Lord Elibank declared.

Referring to last year's Empire Settlement Act and the proposed £1,500,000 (£7,500,000) grant to be given under the act, Lord Elibank said: "I want to ask to what extent the treasury influences the policy of the overseas settlement board in the expenditure of the money. I suggest the treasury has too much control over expenditure and interferes too much with the policy of the overseas settlement committee."

Lord Barnby, Conservative, declared that in Canada the official view was that an inflow of migrants was a challenge to employment.

"The facts are so palpably the reverse," he added, "that it is regrettable that means have not been found to convince organized labor of the position."

Airplane Production

London.—Sir Kingsley Wood, Air Secretary, announced new moves to step up warplane production. He announced a new aeroplane carburetor factory has been founded in Coventry and that the Bristol Aeroplane Company's plant will be developed through a government grant.

TWO "QUEENS" MEET AT TENNIS PARTY

Helen Wills Moody, who made a remarkable come-back by capturing the All England women's singles title this summer, is seen above with the former Queen of Spain, as they attended Lady Croft's lawn tennis party in London.

Artificial Restriction On Wheat Acreage Opposed By Pools

Calgary.—Artificial restriction on wheat acreage is not favored by directors of the prairie wheat pools.

At an interprovincial conference of the Manitoba, Saskatchewan and Alberta pools here it was declared a prescribed quota of wheat for each individual farmer to sell would be preferable in Canada to artificial restrictions of acreage.

Under the quota system a farmer could put in whatever acreage he desired but he would be allowed to sell his "quota rights."

Acreage was considered, it was announced, during a discussion on marketing policy.

A telegram was despatched to the Dominion government during the session urging a minimum wheat price of 87½ cents a bushel, No. 1 Northern, Fort William, be established by the Canadian wheat board for the 1938 crop.

Such a minimum, it was stated in the telegram, would guarantee an average net price to farmers in western Canada of 60 cents a bushel for their wheat.

Support of an international committee to regulate wheat sales quotas throughout the world to protect price levels was urged by the director-delegates to the conference, it was announced.

The Dominion government will be requested to give fullest co-operation on the part of Canada to such a committee.

Discussing future marketing policy, many of the directors expressed themselves in favor of producer-control of marketing. They favored the establishment of federal government regulations to enable wheat producers to market their grain on a basis of complete control when a substantial percentage of growers vote in favor of such regulations.

The telegram urging the 87½ cent pegged price for wheat was sent to Hon. W. D. Eider, federal minister of trade and commerce.

Given a reasonable return, the proceeds of the 1938 crop, it was declared, would be of considerable value in aiding the rehabilitation of western agriculture and would aid business recovery.

If the minimum price were set any lower than 87½ cents, such a price would fail to be of any material assistance to the economy of the west.

Out-of-town delegates were banquet guests of the Alberta pool, at which Mr. Wesson presented a report on the Empire producers' conference in Australia and Ben S. Plummer, director of the Alberta pool, delivered an address on the convention of the American Institute of Cooperation held at Pullman, Wash., last week. Mr. Plummer attended the convention.

In an interview, following the session, which was private, Mr. Wesson said the initial wheat board price must be of such an amount as to encourage deliveries to the board.

"If the initial price is set too low and daily market quotations are above that figure in all probability a very large number of growers would accept the open market figures," he said.

"Based on past experience, the hedging pressure would automatically drive down the open market price to the minimum and deliveries would go to the board."

"A low figure would naturally create a low world price level."

He declared Western Canada could not afford to "give away her first good crop in six years."

It is necessary, he added, there be a reasonable price return not only to assist the individual farmer but to rehabilitate western agriculture.

A United Canada

Is Aim Of Youth Congress States Financial Chairman

Vancouver.—Canada's Youth congress is endeavoring to unify Canada through its young people, according to Margaret Eddy, financial chairman of the congress, who was here on a visit from Toronto.

"People misunderstand the motives and objectives of the Youth congress," she told interviewers. "Our main objective is to make Canada a united nation from shore to shore."

French Fighting Force Passes In Review Before King George VI.

Paris.—The close co-operation of French and British armed strength was sealed symbolically when 50,000 French fighting men and the newest war machines passed in review before King George VI. and the President, Albert Lebrun, of France.

The bonds were further tightened by M. Lebrun's acceptance of the king's invitation to visit Great Britain before his term as president ends, May, 1939. The President and Madame Lebrun will go to London within the first three months of next year.

As a sequel to the military show, Lord Horatius, British secretary for war, and the chief of the French general staff, Major-General Marie Gustave Gamelin, will confer and are expected to review Anglo-French co-operation and take further steps to assure effectiveness of the military co-operation plan reached at London in April.

A new spirit of optimism was reflected in quarters close to the foreign office after the impromptu conversations between French and British diplomats.

Foreign Minister Bonnet and Foreign Secretary Viscount Halifax held no formal discussion but were said to have talked several times during the military review at Versailles and on trips to and from Paris.

Bonnet also saw Stephen Osusky, the Czechoslovak minister to Paris, and was reported to have assured him that "the situation in central Europe will develop favorably," with an easing of tension between Germany and Czechoslovakia over the 3,500,000 German minority under the Prague regime.

Poor visibility marred plans for a display of 600 war planes which were to have swept overhead during the morning parade. They took to the sky in mid-afternoon, flying over the Palace of Versailles. The king and president watched from the palace grounds.

After the Versailles review the Queen and Madame Lebrun joined the chiefs of state for a sumptuous luncheon in the palace.

One hundred and twenty guests were served at a huge table at the Quai d'Orsay. The dinner service was one given to Napoleon and Josephine by the city of Paris. Hon. Philippe Roy, Canadian minister to Paris, and Mme. Roy were among the guests.

French sources looked upon the king's invitation of President Lebrun to London as a most pleasing demonstration of his expressed pleasure over the warm welcome accorded the queen and himself by the government and people of France.

For more than an hour infantry, cavalry and artillery regiments—the flower of the French army—swung by the red-capped reviewing stand at Versailles to the music of massed military bands.

King George, in the scarlet tunic of a field marshal, and President Albert Lebrun of France reviewed the colorful columns of marching men, totalling 50,000, supported by hundreds of tanks and about 50 aeroplane bands.

The King and President Lebrun were taken from the station to the reviewing stand in a bullet-proof automobile flanked by a mounted guard of African Spahis carrying trumpets.

The review assumed particular significance in the light of the conference of Viscount Halifax, British foreign secretary, Premier Daladier of France and Georges Bonnet, French foreign minister.

At this conference France was reported to have sought a British promise to resist Germany's campaign against Czechoslovakia, as a guarantee of peace.

It was generally considered that the swift foreign office communiqué issued after the diplomatic conference meant just what it said—France and Great Britain stood by the general terms of their April agreement to act together to preserve peace and to be ready to fight together if their efforts failed.

NOTES AND COMMENTS

WANTED—AN EDITOR, by This Great Family Journal.

DO NOT BE STARTLED by this introduction. The present editor is going away, and in order to give an opportunity to anyone who believes he can do the job better than ourselves, we invite applications or offers for the next three weeks.

THERE WILL BE NO CESSATION from the usual appearance of The Journal even though we be absent, for the sub-editor and the foreman will pilot the craft during the editor's absence. There are so many who have a hankering to run a newspaper that we are prompted to extend the opportunity to embryo journalists.

THE PRESIDENT of the Canadian Weekly Newspapers Association, George W. James, who publishes an excellent weekly newspaper in Bowmanville, Ont., invited the mayor and council of that town to assume the duties while he attends the annual convention in Vancouver, which will be the meeting place for weekly editors from the Atlantic to the Pacific, including Newfoundland.

THERE ARE MANY individuals in the community who might interest their fellow citizens by editing the paper. Expression of views might bring lasting benefit to the community, and undoubtedly would prove interesting, for every person has some ideals on which he could hold forth, if not on the public platform, in carefully considered words.

OF COURSE, comment must be confined to matters constructive or of general interest, for criticism of others might lead to serious consequences and bring irate subscribers around our ears like a ton of bricks. But seriously, if any man or woman believes they have a fair for bursting forth into print, and can show us how to do the job a little better, then their services will be welcomed.

DID YOU EVER SEE such an epidemic of painting? Main street is hardly recognizable from its former self, now that its face has been cleaned, with the exception of a few dirty spots that are more conspicuous than before the "clean-up and paint-up" started. It shows that people follow a good example. The new proprietors of the theatre started the paint brushes swinging, quickly followed by Coleman Hardware Co. Then falling quickly into line came the Palm Confectionery, lately taken over by two enterprising young men, and so contagious was the effect that almost overnight every painter in town was employed and there is still much to be done. The latest to fall into line at this writing is the Community hall, originally built by Coleman miners, and which it is stated has not been painted in the thirty odd years of its existence.

THERE WILL BE A BLAZE of reflected glory when all the buildings in the business area have undergone the transformation, and visitors will open their eyes in admiration, if not astonishment that such a change has been effected from the drab and weather-worn appearance of this busy industrial town so beautifully located in the mountains. To our mind, it is a direct result of steeper output of the mines over the past six years, for not only in the business area, but in the residential sections of the town there has been marked improvement.

IT ALSO DEMONSTRATES that freedom from labor troubles, which cause intermittent cessation of work, results in greater prosperity for all, for it is from coal output and steady marketing of the product on which the town depends, no matter if one works in the mines or sells goods or services to the people. There has never been a more steady era of progress in the history of Coleman during its 35 years of existence than in the past six years.

PIPE-DREAMS GO A-GLIMMERING! Another illusion of the people was shattered this week, when automobile owners living in the local improvement district received assessment notices for their cars from the Social Credit government. Before you can install toilet fixtures in your home, you must now pay the government \$5.00. There is not an avenue of taxation that the present government has overlooked. Even householders' furnaces are taxed. This is a sore touch with those trusting souls who believed they were to receive dividends every month. Never has a provincial government in Alberta levied so much in taxation. Figures prove it; it's none of this "A man told me!" It's real, hard facts. One former supporter, and there are likely hundreds more, remarked: "I have always supported the S. C. Party, but this blankety—well finishes me."

INTERESTING at times it is to see something which you have casually commented on, copied in other newspapers. A few weeks ago humorous reference was made in this column on how circumspect a weekly newspaper editor must be; yet a "keyhole reporter" and broadcaster like Walter Winchell gets away with stuff that would bring near catastrophe on the weekly editor. This week from the Dominion Press Clipping Bureau, Toronto, came a package of clippings from newspapers in every province of Canada which had reprinted this comment. In newspapers from Newfoundland, the Maritimes, clear across to Vancouver the comment had appeared, to the number of 80, and one newspaper in Quebec, printed in French—L'Echo De Lotbiniere, Montmagny—had translated it and reprinted it for the amusement of its readers.

PAINTING the town with—not exactly sunshine—but it helps to spread good cheer and is inviting to strangers, such is the atmosphere created by the vigorous work of painters' brushes and bright colors during the past few weeks. Let the good work continue until we have a main street that visitors will pause to stop and admire instead of hurrying through as fast as cars will carry them.

MAKING CANADA

A BETTER PLACE IN WHICH TO LIVE AND WORK
A Series of Letters from Distinguished Canadians on Vital
Problems Affecting the Future Welfare of Canada
Specially Written for Canadian Weekly Newspapers Association

Dear Editor.

With regard to the question of a platform for the Canadian weeklies, any suggestion I have to offer would be based on the conviction that our troubles, and the world's troubles, have primarily a moral rather than an economic basis; or perhaps it would be more accurate to say, a moral basis underlying the economic. For this reason, I would have our papers inculcate high standards of political, business and personal morality, and denounce lapse from them. As practical measures in this direction I would suggest:

1. That moral and ethical instruction, with the object of developing character, should be given greater prominence in our educational system, which at present emphasizes the intelligence, with a view to material advantage.
2. That more attention should be paid, and more encouragement given, to the scholars endowed with more than ordinary ability, so as to develop their brains to the highest degree possible, with a view to producing leaders of first rate capacity—our great need. At present our educational system is based on the average pupil, with special attention paid to "the under-privileged," while the super-privileged are given little opportunity to develop their talents, which may be of the highest use to the state.
3. The development of our library system, with a view to encouraging adults to continue their education after leaving school. School should be the beginning of education, not the end. Training to read will have to begin in the schools, and should be part of the curriculum. Thus we shall go far to solve the problem of adult education. The new curriculum recently introduced by the department of education is a move in this direction.
4. The organization of a highly trained, non-partisan civil service in

C. H. HALE

both the federal and provincial fields of administration, and the elimination from the civil service of the patronage system. This would do much to improve public administration and discourage corrupt politics.

5. An effort to raise the standard of sport, which has a distinct effect on the character of the people. This applies both to the players and to the "fans." Commercialization has made winning the chief objective.
6. A movement to restore home life. In particular, by removing the burdensome taxation, which makes ownership of property unpopular, and often a liability, and is driving people into apartments instead of homes.
7. To preach the doctrine of contentment and self denial to a generation bent on pleasure and covetous of all that their neighbors have.
8. To inculcate respect for law, because it is law.

That will do for my share. If you care to incorporate any of these ideas in your programme, I claim no copyright.

Yours faithfully,
C. H. HALE, Editor,
Orillia Packet and Times.

-- AND COMMUNITY NEWS --

Your community weekly newspaper is the best advertising medium for building up customer goodwill.

Cruising on The Great Lakes

Canada's unique inland sea voyage across the Great Lakes is a delightful holiday outing in addition to being a pleasant and interesting alternate route on a cross-Canada trip.

More people every year are turning to the Canadian Pacific Great Lakes Steamship cruises for a holiday that possesses attractions out of the ordinary. The 542-mile trip is along a magnificent lake and river shoreline, and is sometimes completely out of sight of land. Leaving Port McNicoll, the boat threads its way over a historic Indian water route through beautiful Georgian Bay; strikes out into Lake Huron, second largest of the Great Lakes, 207 miles long and 101 miles

wide; winds through St. Mary's River, the international boundary; passes Sault Ste. Marie, and emerges into Lake Superior, the world's largest lake.

Shipboard pleasures which contribute to the charm of the trip are the change of air, refreshing coolness, magnificent scenery, and complete rest. The steamers are equipped for deck sports, including quito, shuffleboard, and deck golf. Dancing and music enliven the evening hours.

The two Canadian Pacific steamers "Keewatin" and "Assiniboia" are back in service groomed for the most exacting of up-to-date travel demands. In addition to the regular winter check-over they were modernized in other ways, several staterooms in each

being luxuriously renovated and additional reading matter being supplied for the libraries.

The schedules make it possible to take an enjoyable week's return trip from either end of the lakes, with overnight stops at destination. Special boat trains connect with all arriving and departing steamers. In addition, attractive all-expense tours at very low cost have been arranged to provide pleasant combinations of rail trips overland and steamship cruises across the Lakes, with leisurely stop-overs at famous vacation resorts. The weekly excursions of the "Manitoba," leaving Port McNicoll Mondays for Fort William, returning Saturdays, are also proving very popular this year.

Local News

Mr. E. D. Battum, municipal auditor, of Calgary, was here this week on a regular visit to the town offices.

Victor Law, son of Mrs. W. J. Bartlett, of Blairmore, recently returned to Crossfield, after a three weeks' visit.

Fred M. Robinson, of Edmonton, is relieving at the local liquor store in the absence of Mr. Davidson, who is on vacation.

Ivor Morgan is at present attending the Diesel Engineering Schools at Vancouver. He intends being there for another month.

Mr. and Mrs. John Kinnear, senior, accompanied by their daughter Annie and Mr. Miller Fleming, will motor to Calgary this week end.

Mrs. Tom McCoy and daughters left Tuesday for Lethbridge, where they will spend a month's vacation, the guests of relatives.

Mr. J. W. Fraser, of Edmonton, is the guest of his daughter, Mrs. Frank H. Graham and Mr. Graham, arriving last Friday afternoon.

Mr. and Mrs. L. A. Caroe, Jonty and Lawrence, accompanied by Mr. and Mrs. Neil McKinnon, left Wednesday for a vacation at the coast.

Mrs. John Lawrence returned to her home at Drumheller on Friday, after three weeks' visit with her daughter, Mrs. A. Chalmers.

Mrs. I. James will be hostess at a shower to be held at her home on Friday evening in honor of Mrs. Leslie Beech (nee Muriel Jackson).

Mrs. Aylsworth, of Red Deer teaching staff, was the guest of Miss Margaret Dunlop, and Miss Powell and Miss Sellen, enroute to the coast.

Mr. and Mrs. Fred Henderson, of Lethbridge, returned home on Wednesday evening, after visiting several days with Mr. and Mrs. Bert McIwen.

Wilfrid Dutil, Bill Gate and Angelo Gentile are enjoying several days' fishing at the North Fork and Race Horse rivers. They intend returning on Friday.

Local News

WORLD HAPPENINGS
BRIEFLY TOLD

A university president was chosen to head the British Broadcasting Corporation.

Despite constant Japanese bombings, the Canton-Hankow railway realized a profit of \$4,000,000 for the financial year ending June 30.

A. P. Patrick, one of the first residents of Calgary and the oldest practicing surveyor in the Dominion, was 90 years old on July 18.

Miss Majorie S. Lettich, of Johannesburg, South Africa, is making a tour of Canada and the United States to study Canadian and American architecture.

Remodelling of hundreds of grain elevators in the west closed during drought years is now under way to handle the 1933 crop, grain men stated.

Constable E. R. S. Pink of the Royal Canadian Mounted Police, Ottawa, suffered a neck fracture when the motorcycle he was driving collided with an automobile.

Adelard Godbout, leader of the provincial Liberal party, announced sweeping plans for reorganization of the Liberal political organization in Quebec.

Auxiliary armament plants designed to supplement the output of government munition factories in case of an emergency are to be established in South Australia, Defence Minister H. V. C. Thorby announced.

Descabeado volcano, 12,750 feet above sea level on the frontier between Argentina and Chile, erupted recently, pouring forth ashes and causing persons living in the vicinity to flee. The volcano had been comparatively quiet since 1832.

Old Timers Believe Story

That Satan's Footprints Are On Island Off Nova Scotia

About three miles off the eastern coast of Nova Scotia is a small island, known as White Head light, where Satan is supposed to have walked, according to this story by Anne Loney.

Old-timers do not take kindly to your doubting their story and will promptly offer to show you his footprints in order to prove their statement. Some will tell you that Captain Kidd buried his not here and that the devil is guarding it; others, that a sailor murdered two children and disposed of their bodies on this spot, while still others claim it is the place where many scenes of mutiny, piracy and bloodshed were enacted.

Whatever the explanation, there is no doubt about the footprints. I have seen them myself. They appear to be those of someone who walked out of the woods, across the rocks and into a clump of bushes. Those of one foot are clear and defined, while those of the other are round and deformed the latter according to the story-tellers, being positive proof that they are those of the devil, for he has not one good foot and one cloven hoof?

Makes Journey Pleasant

If Motorist Has Sense Of Humor And Uses It

The correspondent of Highways Bulletin says if you are one of the many to whom driving is no longer a pleasure, here is a hint that may be helpful. Next time you start out on a trip, take that chip off your shoulder! And take your sense of humor along. Promise yourself that you won't let little things disturb you, and see what happens. If someone attempts to steal your right of way, let him have it. Don't yell at him, but smile instead. Be indulgent, as you would be with the small boy who reaches for the largest piece of cake on the plate. A safe journey—and a surprisingly pleasant journey—will be your reward.

For Quicker Diagnosis

X-Ray Motion Pictures Would Be Invaluable To Doctors

X-ray motion pictures transmitted by wire for quick consultation by distant diagnosticians were forecast by Dr. Leo G. Rigler, professor of radiology at the University of Minnesota. He said that when the X-ray motion picture becomes a reality a specialist a thousand miles away could sit in his office and watch our heart beat.

The Hymn Said So

After the early morning services the sexton found a lady's wrist watch at the Church of England in Bridge-town, Barbadoes. The parson announced the discovery at the following service and said that the owner could have the watch by applying at the vestry. He thereupon announced Hymn 362: "Lord Her Watch Thy Church Is Keeping." 2265

Good Place To Live

Small Town Now Has Many Advantages Over City

Publisher Roger Babson got his name spread across the newspapers of the continent the other day by advising university graduates not to get married hastily but to get a job in a small town and to put their savings into a small farm. "Your real hope," he said, "is in getting a small business of your own. Try to get a job in a small town."

Henry Ford is equally enthusiastic about the small town as a place to work and live. His spokesman, W. J. Cameron, made some pertinent remarks about the matter not many weeks ago. "Nowadays," he said, "no one need go to the city for a career. Big things can be done in smaller places. Towns and villages are even coming to be preferred for many types of enterprise."

The small town has always been a good place to live. To-day, any disadvantages it may have had as to distance or isolation have disappeared. Traditional qualities of friendliness, freedom and fresh air have been enhanced by most of the amenities of "city" life.—Financial Post.

Guide For Better Picnics

Ohio Y.M.C.A. Issues A 14-Page Book Of Rules

Particular picnic planning is now the thing. The Akron (Ohio) Y.M.C.A. has taken up the matter, opening the first Picnic Institute, with a 14-page manual issued for the guidance of those who are impressed by the teachings of the Institute.

This manual declares that in talking picnic the plan must be submitted to the following test:

1. Is the picnic built with the group or just for them?
 2. Does it afford wholesome pleasure and enjoyment?
 3. Does it afford opportunity for natural expression of the group?
 4. Will the results justify the time, money, and energy expended?
- Even the choosing of a place to go must be carefully thought out beforehand, according to the new rules. "In choosing the picnic site, be sure of the following things: the manual:
1. Woods enough for shade.
 2. Dry and well drained.
 3. A level open space large enough for games and activity.
 4. Good drinking water available.
 5. A shelter in case of rain.

FOR A YOUNGER, SLIMMER LOOK

4850

R. K. McINTOSH NOW CHAIRMAN OF BOARD OF GENERAL FOODS LIMITED

R. T. MOHAN

R. K. McIntosh, who for a number of years has been Vice-President and General Manager of General Foods Limited, has been elected to the office of Chairman of the Board of General Foods Limited, in which position he will operate in an advisory capacity to his successor, R. T. Mohan, who has been elected Vice-President and General Manager of General Foods Limited.

In retiring from active management of the Company, Mr. McIntosh has elected to take advantage of the corporation's retirement plan. The management of General Foods has requested Mr. McIntosh to continue in an advisory capacity to the management of General Foods Limited.

Mr. Mohan has been Managing Director of Douglas-Pecan Limited, at Cobourg, and in charge of production of the company's Montreal plant, which produces Walker Baker Chocolate and Cocoa, Franklin Baker Coconut, Maxwell House and Sanka Coffee, Minute Tapioca and Jell-O.

R. K. McINTOSH

He is also a director of Douglas-Pecan Limited and Grape-Nuts Company Limited, both of London, England. In addition to his present responsibilities, Mr. Mohan will take over his new duties as rapidly as possible.

Mr. Mohan is a graduate of McGill and Queen's Universities, and has had a number of years' experience in food production and sales. Under Mr. McIntosh's leadership, the sales of the company during 1937 were the largest in its history, while the sales in the first six months of 1938 exceeded the same period last year.

By the end of 1938, Mr. McIntosh will have completed 40 years in the food industry. He joined P. McIntosh and Son in 1896. This firm, which was formed by his grandfather and father in 1876, was the first to put packaged cereals on the Canadian market. McIntosh joined the Canadian Postum Company, the predecessor of General Foods, in 1920.

Bravery Has Been Recognized

Award Given To Out For Rescuing Kitten From Fire

Whitely, a thin-faced, big-eyed mother cat, has received a bravery citation from the American Humane Association because she rescued her family of kittens from a burning building.

Presentation of the award was made a public occasion at the Buffalo City Hall with Mayor Tom Holling officiating in person. Announcement of the award was made by the association.

Until June 22, Whitely and her brood lived in a barn near the home of Whitely's mistress, Mrs. Mary Wydro. Early that day the barn caught fire.

Fire engines came, and firemen saw Whitely emerge from the billowing smoke, with three kittens. And then Whitely committed her act of bravery. One of the kittens—Tennie—was missing. She dodged between the legs of firemen playing water on the barn and returned triumphantly with her week-old kitten in her mouth.

Living In Luxury

Cow Has Gabled Home With All Modern Equipment

Rosie, a nine-year-old cow, is living the life of royalty in a cottage-like barn equipped with gas heaters and running water. Rosie's gabled home in Butler, Pa., has a front porch, a kitchen and a sink, an ice-box and a lawn-like meadow on which she browses. Every day she gets a bath. Jennie Nixol, owner of Rosie, explained that she built the barn in the style of a house to "demonstrate that a barn does not have to be an eyesore."

If you lend your car to a neighbor and he gets into trouble, you're in!

Indians Make Complaint

Appeal To King George To Keep White Invaders Off Reservation

A plea to King George to "keep the whites off the tribal land" of the Stony Indians on the Kootenay plains, 75 miles west of Rocky Mountain House, has been forwarded to London.

In a letter signed by Chief Walking Eagle, it is urged His Majesty carry out the promises of the "great white queen," Queen Victoria.

In 1877, the chief declared Queen Victoria promised his tribe, "You will have plenty game, tobacco food."

Now white men have invaded their lands, hunting and trapping, and he wants the Kootenay plains declared a reservation for Indians only.

The Stony, says Chief Walking Eagle, have lived on the Kootenay plains "since the world began." They refuse to move to the Marjorie reserve, 45 miles west of Calgary.

Two Wheeled Automobile

Pre-War Invention Made Use Of A Gyroscopic Attachment

One of the world's lost inventions a gyroscopic two-wheeled car, invented before the war by Count Schlowinsky, has been unearthed by workers excavating in the grounds of the Wolsey car factory at Birmingham, England. The chassis was an excellent condition, despite the burial of the car for 25 years.

The Count, a Russian lawyer, invented his strange car in 1912. He believed that with the aid of a gyroscopic two-wheeled car could be made stable, with resultant economy and cheapness owing to the saving of weight and the smaller engine size needed for a given speed.

He gave a successful demonstration run in Regent's Park in 1912, but owing to the war, work had to be abandoned and the car was eventually buried as junk.

SUNDAY SCHOOL LESSON
JULY 31

SAMSON: STRENGTH AND WEAKNESS

Golden text: Be strong in the Lord, and in the strength of his might. Ephesians 6:10.

Lesson: Judges, Chapters 13 to 16. Devotional reading: Ecclesiastes 12:1-7.

Explanations And Comments

The Slaying of a Lion, Judges 14:1-4. As we know from the stories of the patriarchs in Genesis, it was customary for parents to conduct the negotiations of a son's marriage and also to pay the dowry. Compare Gen. 34:1-12. A Philistine woman found favor in the eyes of Samson, and he asked his parents to get her for his wife. As they were on their way to Timnah to carry out his purpose, a lion crossed his path. So strong was he that with only his hands for a weapon he tore the lion as he would have torn a kid.

Through Delilah's Treachery, Samson is at Last Captured and Imprisoned, Judges 16:5-21. Samson had taken the Nazirite vow, and that meant that he was ceremonially set apart to the service of Jehovah. That means, also, that he was to abstain from wine all his life, that no razor was to touch his hair, and he was never to eat anything that was ceremonially unclean. The point the story makes is that Samson's great strength was given him by Jehovah and when his long hair, the symbol of his consecration to his God, was cut, he had no more strength than any other man. It rather looks as if most of the restrictions which Samson's vow placed upon him had already been broken and that the breaking of the restrictions which Samson's Death, Judges 16:23-31. Read Milton's "Samson Agonistes." Samson threw away his life when it was no longer worth living. It was a case of self-sacrifice in order to obtain vengeance.

"That mass of humanity, profusely mild of mood and mild of temper, and multitudinous of the passion for the future of mankind and vanity of person, magnanimity and sensuality, high judgment, reckless indiscretion, chivalry, savagery, solidity, fragility, was dust. He perceived the lack of his weakness, but it was a strong man that fell. His end was a derision because the animal in him had wrecked the human piety and piety" (Meredith).

"The lesson for us is not in the shaven head; it is in the crucifixion, in the man who, set aside by his parents to God, had set himself to the task of his life. It is in the mother's wonder and his father's prayer and all the consecration of his life, his death, his resurrection, his command and played with moral defeat" (Gaius Glenn Atkins).

Woman Doctor Won

Performed Operation On Native Guide Under Adverse Conditions

A thrilling story of rescue and hardship on the freezing slopes of the Drakensburg mountains, the western boundary of Natal, has reached Durban, South Africa. A native mountain guide was on his way down the mountain to the mission farm hotel when a sleeping bag fell from the pack horse and rolled to the cliff edge. The native tried to recover it, but the tuff of grass on which he was standing gave way. After a short sheer drop he rolled about 350 feet down a steep slope over boulders and rocks.

His native companion climbed down to where the guide was lying badly injured and unconscious. Unable to move him, he made a blanket shelter with a blanket and hurried off for help. A woman doctor who was visiting the hostel volunteered to join the rescue party, and that night performed a successful operation on the injured man in a deserted cave high up the mountain.

An aid in disinfecting the instruments, and the operation was performed by the flickering light of candles. The native is now recovering.—Brandon Sun.

Easily Explained

A lawyer was cross-examining a witness.

"You say that the fence was about fourteen feet high, and that you were standing on the ground—not mounted on a ladder or anything?"

"I do," responded the witness. "In that case," said counsel, "perhaps you will be good enough to explain to the court how it was that you a man of five feet four, could see what happened on the other side of the fence fourteen feet high?"

"Certainly," chirped the witness, naively. "There was a knot hole in the fence."

Proved Once More

Hon. R. J. Manion's supporters used an advertisement in the Ottawa Journal to set forth the attainments of their candidate for the Conservative leadership, states W. L. Clark in the Windsor Star. It was a nice ad and had position opposite the editorial page where all the delegates could see it. As Dr. Manion walked away with the leadership race, once again we point out that it pays to advertise in the newspapers.

In Prison Twenty Years

Woman Spy Once Condemned To Death Enters Convent

A woman who 20 years ago was condemned to die before a firing squad as a spy, recently left prison to become a nun.

For a few hours, on her way from prison cell to convent cell, she was at liberty in a world she had not seen since 1913.

A pale, white-haired figure in black, she passed through the gates of Rennes prison in Brittany.

She stopped and blinked at the summer sunshine. There was fear and bewilderment in her eyes as she looked at the bustle and listened to the noise around her.

It was a very different world from that which Marie Dubret last saw when, at the age of 22, she was sent to prison.

She had been well known to British soldiers in the camps near Abberville and Amiens.

In 1914 she was arrested on the Somme April and brought before an Allies' court-martial, accused of spying. She had given the Germans secret information about French and British troop movements.

She had mingled freely with the soldiers near the front line, picking up information. She was caught red-handed by a French officer.

She was condemned to be shot. But it was then October, 1918, and in the excitement of the last offensive she was forgotten.

This saved her life. After the armistice her death sentence was commuted to imprisonment for life.

In prison she was consumed with remorse for what she had done. She sought peace and solace in religion. She was a perfect prisoner, quiet, diligent, pious. She hardly ever spoke. Her leisure time was spent in her cell reading the Bible.

The prison chaplain was touched by her penitence. The nuns who visited the prison took a special interest in her.

Her cell was the one occupied by Maria Mancini, the pretty Corsican girl who was sentenced to penal servitude for life for having participated in the famous vendetta which caused the death of several Corsican bandits.

Efforts were begun to try to secure a pardon for her. She declared that if she were released she wanted nothing but to enter a convent.

When she left prison she looked very thin, but younger than her 42 years.

She went straight to the secluded Convent of Economy, where she is to become a sister of the nuns of Beate.

Grasping the arm of her son, who took her out of the prison, she arrived on the verge of collapse at the gates of the cloisters and had to be helped in by two nuns.

Makes Satisfactory Rugs

Germany Has Perfected Project For Using Human Hair

To free Germany further from dependence on foreign raw materials an announcement has been made of the perfection of a project for the manufacture of carpet yarns from human hair and artificial wool-cell wool or viscose. Human hair, especially women's, has proved very satisfactory for rugs, and that branch of the Nationalist party devoted to the collection of junk is now collecting it also. Approximately eight cents per pound is paid for it. Barber shops will be combed by party scrap squads to collect it.

Dear Old Soul (in curiosity shop)

I suppose this is another of those horrible futuristic paintings which you call art.

Shopkeeper—Excuse me, madam, but that's a mirror.

Phosphate rock deposits discovered and secretly investigated on Haaboma Island by a Japanese company may be so large as to make Japan self-sufficient in this fertilizer material.

DOCTOR BULL IN DEMAND!—News of the World.

"JUST ACROSS THE STREET..."

Yes... they're using Gyproc in that new building—all the interior walls and ceilings. The contractor knows that more and more people are using Gyproc, as they learn about Gyproc's many advantages; that it won't crack or sag or warp; that it's made from fire-proof mineral gypsum; that it is permanent. Gyproc is as easy to cut and nail as lumber. Saves time and expense in construction, with no muss or bother.

Yes, I asked him about that—the joints are invisible—the finished walls and ceilings are absolutely smooth—perfect for any type of decorating.

A free booklet tells all about Gyproc for new buildings. Write us to-day.

COPYRIGHT-COURTNEY RYLEY COOPER • • W.N.U. SERVICE

CHAPTER I.

Jack Hammond reflected, as he walked up from the wharf, that rain was Prince Rupert's most bountiful crop.

He made the climb from the water front and cut through the little terraced park, where totem poles stood gleaming with moisture and grotesquely lonely. Everything dripped in Prince Rupert this morning, even the discolored, stuffed Kodiak bear in front of Al Monson's trading store. At last Hammond halted abruptly, looking over the wooden fence of a back yard. Howls and whines had centred his attention.

"What are you trying to do with that dog?" he asked. A man halted in his effort to kick a harnessed mongrel into progress along a muddy space before a makeshift sleigh, weighted with stones.

"Going to make a sled dog out of him."

"That boss? He hasn't got the weight for it."

"Oh, he's pretty strong." The man grinned. "Say, they'd be buying anything where this dog's going!"

"Where's that?"

The pseudo-trainer jerked his head toward the white pinnacles of distant mountains.

"Over the hills there in B.C.," the man said, "up the Caribou river, somewhere around the valley of the Stikine. Haven't you heard about it?"

Hammond's features had become strangely grim.

"What's going on?"

"Where've you been that you haven't read the papers?"

"On the Aleutian, coming up from Vancouver."

The dog trainer stared.

"The ship that got in this morning?" he asked. "And you didn't know about it? Then you must have been deaf, dumb and blind. There were plenty of others who came on that boat—just because of it."

"Because of what?" Jack Hammond's hands, where they gripped the fence, were strangely discolored.

"Well, if you ain't kidding—the gold rush. Two fellows found placer gold up there. A couple of guys named McKenzie Joe Britten and his partner, Jack Hammond."

"Oh, I see," said Hammond jerkily.

"Well, I figured you might play the fool if you ever got to Seattle and met that girl, but I never thought you'd split the beans like you did. Why didn't you wait until you hit the bush again before you got drunk? There'll be a thousand fools up in the Stikine country before break-up. I'm hitting out of here with about supplies to get in there and protect our interests before the rush starts. See our lawyer and be sure our claims and leases are in good shape. Then come on with supplies as quick as you can."

Hammond turned to the waiting boy beside him and ordered his bags taken to his room. Then he headed for the door; again on the street, he started toward a three-story building a few blocks away.

His course was a broken one. Townspeople he knew halted him to question the accuracy of newspaper stories which Jack Hammond had heard. His evasiveness only nettled them.

"What if you haven't seen the newspapers?" they asked. "You made the discovery. The Vancouver papers have been full of it. You know all about it—what's the use of trying to keep it a secret?"

Soon a crowd had gathered about him. Hammond fenced frantically. A big man, with a faint break of accent in his voice, poked a hard-skinned, hewed-out face close to that of Hammond.

"My name's Olson," he announced. "I've got a map here—suppose you point out the place to us."

Hammond pulled at his breath. "Maybe I'd better," he agreed. Then, as Olson poked the map before him, "Didn't I see you on the boat from Vancouver?"

"Yah, you saw me," said Olson. "And a lot of others."

"Why didn't you come to me then? I could have explained all this to you—maybe you wouldn't have been so anxious about getting off here."

"You got off, didn't you?" asked the man with the pack on his back. "That was enough for me," came another voice. Then a short man, red-faced, and with an excitable manner, edged forward.

"How about me? I saw the story in a Winnipeg paper and took a plane for Jasper Park. Then caught the train up here."

"Yeh, and I came from Prince George," cut in another member of the crowd. "I thought we'd go in from Alaska—around Wrangell."

"You Didn't Try to Throw Us Off the Trail?"

"Look here," asked Olson, "you didn't try to throw us off the trail, getting off here, at Prince Rupert?"

Hammond spread his hands in a gesture of disgust, and for a moment silenced them.

"How in the world could I try to throw you off, when I didn't even know you were on my boat? None of you came near me on the boat."

"Yah," laughed Olson, "how could we? You were in your cabin most of the time. Getting over that head you must have had when you got aboard—down at Seattle. Some time you had down there, yah?"

Hammond straightened. He raised a work-thickened hand, and removing his hat, allowed the cooling rain to fall for a moment on his dark tousled hair. He regarded the crowd which hemmed him in with a look almost of pity in his dark eyes.

"Listen, fellows," he began, "you don't know what you're getting into by trying to beat the country."

"But the map shows that it's just back of Wrangell," Olson insisted. "To hell with the map!" Hammond broke forth angrily. "Certainly it's back of Wrangell. Maybe seventy-five miles, a hundred, I don't know."

"Just below the Stikine river, against the Alaskan border," supplemented the red-faced man from Winnipeg. "The newspaper said so."

"I suppose that makes it a fact," Hammond answered sarcastically.

"Then why don't you go on to

For Your Preserving

Use It This Year

Wrangell by boat and up the Stikine river?"

"You can't go up the Stikine this time of year," an outsider argued. "Might as well try to walk on icicles."

"Will you let me explain the set-up?" Hammond insisted. "If you go by way of the Stikine, you've got to make nearly 200 miles and double back. You can't turn off—

that river runs through canyons almost to Telegraph creek—way past the discovery. It's next to impossible to cover the Stikine route on the ice."

"Boats make that river in the summer time," someone insisted. "Certainly," paddled wheelers. But this isn't summer. The spring break-up in that country isn't due for months. That's the fact."

Then Jack Hammond stood silent, listening to the jangle of words about him. Men were arguing about whether or not the newspaper was correct, as if any inaccuracy were a personal affront. At last in an instant, the thought of gold had torn reason to shreds. Then Olson caught him by the arm and shot the question:

(To Be Continued)

Gossip Law In Papua

Idea To Arrest Offenders Did Not Get Very Far

Appropos of Quebec's padlock law it is interesting to learn that similar ideas have gained acceptance among the natives of Papua in the South Pacific ocean, says the Toronto Star. The natives have their own councilors who act under the tutelage of British resident magistrates. A law was adopted which made it an offence for anyone to spread slanderous reports about their fellows. The councilors thought that perhaps they could improve upon that law, which only operated after harm had been done, to their bright idea was to pass a law providing that "if two or more women are found gossiping together they shall be immediately arrested and put in jail for two months." In this way "bad talk" would be prevented rather than punished.

Whether it was the radio or some virulent bacilli carried across the ocean by the wind that infected the Papuans with such Fascist ideas is a matter of speculation. The incident shows how careful civilized beings should be in these days for their conduct is a worthy example for less cultured peoples. In this particular case the British magistrates exercised their power of veto and Papuan housewives still are at liberty to meet and exchange gossip.

New Railway Ruling

Transport Act Enabling Railways To Make Agreed Charges

Provisions of the Transport Act enabling railways to make agreed charges with customers will come into effect probably early in September. The act was passed at last session of parliament but certain portions only came into effect when proclaimed.

The railway companies were particularly anxious, when the bill was before parliament, that the agreed charges sections of the bill should become law, claiming it would put them on a more even footing with truck competition.

Under provisions of the Transport Act the railways will be able to make contracts with individual shippers to transport their goods at rates lower than the regular published tariffs on condition a shipper gives the railway company all its business. These agreements have to be ratified by the transport board.

Using Statue Of Stalin

The Georgian features of Joseph V. Stalin will dominate the Soviet building at the 1939 World's Fair in New York, instead of red symbolism. Two prominent sculptors, Bogoluboff and Ingal, have been ordered to design the statue of the Communist dictator, scaled to the size of the building, for which architects are drawing designs.

Cricket fighting is a popular sport in China. The crickets battle in a bamboo arena.

Imperial Policy

Development Of The Dominions To Status Of First-Class Powers

One of the main objectives of Imperial policy ought to be "encouragement of the gradual development of the Dominions until they attain the status of first-class powers, having decline influence in the affairs of mankind," Colonial Secretary Malcolm MacDonald declared at Manchester.

Speaking at a luncheon of the Manchester Chamber of Commerce, Mr. MacDonald said that "Industrial development of the Dominions is wisely guided, Great Britain is not going to be the loser."

"What wants developing in the Dominions is simpler forms of manufacture." As people went into the Commonwealth countries and engaged in production, they would make the Dominions a far larger market for Great Britain in the manufacture of more complex products.

He would like to see British and Dominion industrialists get together to work out a plan for complementary industrial production whereby, in the long run, he believed not only the Dominions but also the Mother Country would profit.

A "great constitutional experiment," is now being carried on in India in accord with the highest traditions of British Imperial statesmanship.

He disagreed with the view that the "experiment" had been a fatal step, beginning the complete separation of India and Great Britain. It often seemed to him that the greatest present danger of mankind was the creation of racial rivalry between East and West.

"It would be the final calamity for civilization, if one day war were to break out between East and West. What is wanted is sympathy and understanding between those peoples and the building of bridges which will prevent that division from taking place. The most important bridge of all is provided by Anglo-Indian friendship in the practical work of the Government."

Hills Of Water

Exist In Pacific Ocean Mostly Around Hawaiian Islands

Hills of water exist in the Pacific Ocean, according to Howard W. Blakelee, the Associated Press science editor, quoting Dr. R. H. Fleming of the Scripps Institution of Oceanography of the University of California.

The greatest hill centres around the Hawaiian Islands. The water there is a little more than three feet higher than at the Aleutian Islands, 3,000 miles south.

This vast hummock is called a gyral. It turns slowly around like an enormous top. The northwestern edge of this gyral, which flows past Japan, crosses from the Orient to Alaska, and then curves to flow south along the west coast of the United States.

The top of this hill, the surface waters around the Hawaiian Islands, is warmer than around the edges of the hill, warmer even than that near the equator.

Warm water accounts for the hill. It is not as dense as cold water. It weighs less. Yet deep in the ocean, under the warm water, the pressure at any level, due to the weight of water above is uniform. There is only one way to account for this. The warm water must stand higher than the level of adjacent cold surface water.

The surface water tends to run down the sides of the hill. But it does not run straight down because it is also affected by the earth's rotation and by winds and consequently runs around the hill.

Off the California coast the surface rises seven inches in about 150 miles. This accounts in part for an inshore drift south of Point Conception. Some evidence of this drift along the coast has come from 6,000 bottles dumped overboard last summer by the California Fish and Game Commission to test currents. About five per cent. of them came ashore at points along the southern coast of the State.

Newest Police Service

Cleveland Has Curb Station To Book Traffic Offenders

Violators of Cleveland's traffic regulations now receive a "curb service" at busy intersections. The city has opened what the officials said was the first polling police station in the nation. A four-man police bureau on wheels not only arrested drivers, but charged them with violations on the spot of their offense, booked and released them on bond for appearance in police court. John R. Sammon, deputy traffic commissioner who devised the portable enforcement method, said that "getting the cases while they're hot" speeds up police work.

Automatic Elevator In New York Block Went On Rampage

If you get the creeps in one of those automatic elevators where you push the buttons yourself, it may not be entirely unjustified.

Mildred Watson, 19, a Negro maid, stepped into one in the six-story apartment house in New York, where she works and pushed the button to go down.

The elevator sank to the first floor, stopped with a bump, and abruptly started up again.

At the sixth floor it stopped and abruptly started down again.

Then it went up again. Then it went down again. Then it went up again.

That went on for quite a while until the building superintendent suspected there was something irregular about the elevator making so many non-stop round trips.

He called the police and a squad of officers went into the basement and finally stopped the berserk conveyance.

Mildred stepped out, in good health, but slightly bewildered.

Builds Fortune

Manager Of Aircraft Company Accomplishes Much In Five Years

Frederick Handley Page, 33-year-old and scottish general manager of the aircraft company he founded, has made himself a new fortune in five years and done big things for shareholders in the firm. Now he is leaving for Canada as a member of the commission which will arrange for the manufacture of heavy bombers in the Dominion.

Handley Page, Ltd., announced a final dividend of 20 per cent. tax-free for 1937, plus a capital bonus of 50 per cent. These followed an interim dividend of 10 per cent. less tax and last December a capital bonus 100 per cent.

Basis of Handley Page's new fortune was his realization of the possibilities of the slotted wing device that keeps aeroplanes from spinning when they are stalled.

Nazi Cultural Program

Adolf Hitler Has No Likings For So-Called Modern Art

Adolf Hitler, who once forewore painting for politics, opened Germany's 1938 art exhibition with a declaration that democracies were welcome to modern artists he classed as "cultural Neanderthals" but that Nazi Germany wanted no part of them. The Fuehrer attacked cubism, futurism and dadaism and lauded the Nazi cultural program. He said Nazi cultural propaganda doubtlessly would be recognized in the end as "on the right road," thereby assailing anew "the front of international Jewish culture mongers."

Quill Cutter Kept Busy

Demand for quill pens is so great in London that one quill cutter is making nearly 1,000 a week. A large London hawk shop has a display of quills with quill pens. Goose quills are used as a rule, but pens for fine decorative work are made from crow quills. The cutter has been in the business for 50 years.

Choies starting from India in 1802 killed over 378,000 persons outside of India.

STOP Scratching
RELIEVE itching of insect bites, stings, etc. Itch, hives, eczema, and other skin ailments. Apply D.D. PRESCRIPTION. See your Druggist. Clear, pleasant and effective. Local News

Mrs. William Milley is a hospital patient.

William Michael of Seattle, and his son Bill, and the Misses Rosalie and Hazel Wakin, visited at the Charles Nicholas home this week.

Mr. and Mrs. W. L. Rippon, Lorne and Ralph, will leave on Sunday for a vacation at Vancouver. Mr. and Mrs. J. O. C. McDonald will accompany them, and the trip will be made via the Logan Pass highway.

Mr. and Mrs. W. H. Hayson, Hubert, Alwyn and Miss Wilma Halliwell motored to the Logan Pass on Sunday. Heavy clouds obscured the fine scenery, and on reaching the summit, they were above the clouds.

Mrs. Alex. Muir, of Alexco, is visiting Mr. and Mrs. Robert Gillies. Mr. Muir was here for two weeks and returned last week-end. Mrs. Robertson, also of Alexco, who many remember as Miss Mercer, is also visiting Mrs. Gillies.

Mr. and Mrs. M. Aboussay, following their recent marriage, visited the former's brother, Mr. Frank Aboussay, and Mrs. Aboussay, on their return from their honeymoon trip to the coast. They returned to Wetaskiwin on Tuesday.

W. A. Vaughn, of the Western Grocers, Blainmore, and Mrs. Vaughn, attended the picnic of the company's employees and salesmen at the Experimental Farm at Lethbridge on Wednesday of last week. Despite the hot weather, they had a very enjoyable outing and the picnic was a grand success.

Mrs. C. D. Rogers and Helen left Tuesday for two weeks' vacation at Drumheller, where they will be the guests of Mrs. Rogers' sister, Mrs. Alton Smith, and Mr. Smith. Mr. Rogers and John left on Tuesday morning by car for two weeks' vacation at Arrow Lakes and Sloan, where Mr. Rogers will visit his parents and brother.

Mr. and Mrs. H. T. Halliwell will leave on Saturday for Vancouver, via Calgary, to attend the annual convention of the Canadian Weekly Newspaper Association, to be held in the Hotel Vancouver. They will visit their daughter, Mrs. George W. R. LeRoy, in Vancouver, and return via the Kettle Valley to Pentticon, where they will attend the wedding of Miss Florence LeRoy, daughter of Mr. and Mrs. H. A. LeRoy, of Pentticon, to Mr. William Laurie on August 18.

Mrs. Howard Davies and Mrs. J. Richards were joint hostesses at a shower held at the latter's home on Friday evening in honor of Miss Ismay Hadley, bride-elect. Six tables of bridge were in play, prize winners being Mrs. Wm. Fields and Mrs. W. H. Garner. A feature of the entertainment was a song by the bride-elect. The room and tables were beautifully decorated by flowers from the garden of Mr. W. H. Garner. Miss Hadley was presented with many beautiful gifts, for which she made suitable reply.

BRIDE-ELECT HONORED

Mrs. Wood and Mrs. Russell Ferguson were joint hostesses at a shower, held at the home of Mrs. John Kinneir, senior, on Saturday evening in honor of Miss Annie Kinneir, bride-elect. Five tables of bridge were in play, prize winners being Mrs. A. Dewar, first; Mrs. George Jenkins, second, and Mrs. J. Nash, consolation. Following a dainty luncheon, the hostesses presented the bride-elect with a gaily decorated basket filled with many beautiful presents, she thanking the guests with an appropriate speech.

MR. AND MRS. TOM BURNS SAY HELLO

Mr. and Mrs. Tom Burns, former Colemanites, now residents at Vancouver, made eager enquiry last week at the coast city when in conversation with a member of The Journal staff, about many Coleman people, and asked the privilege of saying "hello everybody" through the medium of The Journal.

Mr. and Mrs. Burns are the proud owners of a beautiful home in Vancouver, concrete sidewalks, lawn and flowers setting it off splendidly. Mr. Burns is now fully employed at an ice-making plant in the city, the plant supplying ice for the fishing boats.

NEW C.P.R. AGENT COMING

In succession to Chas. W. MacKinnon, recently transferred from Coleman to Maple Creek, W. L. Taylor, of Leduc, will commence duty here on August 2nd, when C. C. Totten, relieving agent, will return to Lethbridge.

CREATE A GOOD IMPRESSION

Clear printing, well displayed, either in office stationery or for newspaper advertising, gives prestige to any business. Discriminating advertisers who value appearance and style in their printed matter use only THE BEST.

APPEARANCES COUNT

Progressive business men use progressive NEWSPAPERS to promote business. They want something better than the old village style of printing matter. As a man is judged by personal appearance to a very large extent, so is his business judged by the style in which it is advertised.

NEW VICE-PRINCIPAL FOR HIGH SCHOOL

Mr. Horace Allen, appointed vice-principal of Coleman schools, is the son of Mr. Peter Allen and the late Mrs. Allen, residents of Coleman from 1911 to 1916. His father was a pit boss at McGillivray mines. The new appointee expects to be married early in August. For three or four years he taught school at Wayne, near Drumheller, and he is a graduate of Alberta university, and is about 32 years of age. A brother is employed at McGillivray mines as fire-boss and resides at the Grand Union hotel.

SNAP-SHOTS AND HATS

Editor Bartlett, renowned as the tallest newspaper editor in Canada (and maybe the British Empire) had his photo taken with Murray Saunders, representative of the Ashdowns Limited, Calgary, standing beside him. Murray's head is almost obscured by Bart's cap, which he is wearing, while on the latter's head is Murray's fedora hat, which gives Bart an elongated resemblance to Charlie Chaplin, at least as far as the hat is concerned, for it is several sizes too small and is perched on his cranium as if it were a dicky-bird poised for flight.

INTERESTING TRIP

Stopping here for a short time on Tuesday and enjoying their trip from Calgary over the Banff-Windermere highway and through the Crows' Nest Pass were Allan C. McAfee, dominion inspector of excise, of Ottawa; Colonel Braan, of Winnipeg, also to the national revenue department, and L. R. Hess, manager of Canada Malt-Ing Co., Ltd., of Calgary. Mr. McAfee and Col. Braan intended to continue on to Vancouver after returning to Calgary, and all expressed their pleasure on the trip through the national parks.

LEFT FOR PENTTICON

The Journal's report last week that Dr. and Mrs. Borden had left was premature. Dr. Borden and Prue Dick and Jane left on Tuesday, their household effects leaving the day previous by car. Mrs. Borden will remain here for a few days, later to join the family at Pentticon. Many friends join in wishing them success in their new home in Pentticon, a progressive and growing city on the southern end of the beautiful Okanagan lake.

Mr. and Mrs. Lewis Jones and Owen and Jack motored to Waterton on Sunday.

Dr. Borden's residence was purchased to-day by Mr. Stewart Milley. Mrs. Borden will leave to-night for Pentticon.

The Churches

ST. ALBAN'S CHURCH
Seventh Sunday after Trinity—
Morning prayer and sermon at 11 o'clock; baptisms at 4 p.m. This church welcome strangers.

Baptisms on Sunday, July 24th—
Thomas William Lockhart and David Charles Lockhart, sons of David Lockhart (nee) Florence Makin Fernie; Joan Hirst, daughter of Fred Hirst (nee) Annie Sudworth; Marion Fauville, daughter of Albert Fauville (nee) Emily Elizabeth Poxton.

CHURCH OF THE NAZARENE

Sunday—11 a.m., classes for all, Sunday school meets. 12 noon, morning worship, this will be communion Sunday. 7:30 p.m., evangelistic service.

The prayer meetings will be held on Tuesdays at 7:30 p.m. and Bible study on Fridays at 7:30 p.m.

The church feels fortunate in having the services of Rev. William Clark, of Ireland, for this week. He will preach and sing special messages in song at tonight's service, and also on Friday evening. Mr. Clark has just graduated from the Bible College in Red Deer, and is on his way home to take a pastorate in the Church of the Nazarene in Ireland.

Bring your friends; you will surely enjoy the singing and the gospel messages. Strangers and visitors welcome.

HOLIDAY TRIP TO ALASKA

Miss May Powell, former high school teacher here, now of Ods high school staff, spent a few days here, part of the time as guests of Mrs. F. H. Graham and of Mrs. W. L. Rippon. She, with Miss Sellen, of Hillebert, left on Wednesday for Vancouver, and they will take a trip to Alaska, afterwards spending the remainder of school holidays in Victoria.
